

Build your Genius today.

Day 3 of 5 · no code

Day 3: Build it.

No code. Just your playbook.

Upload. Paste. Name it.

Your Genius has three layers.

Knowledge

what you know

Skills

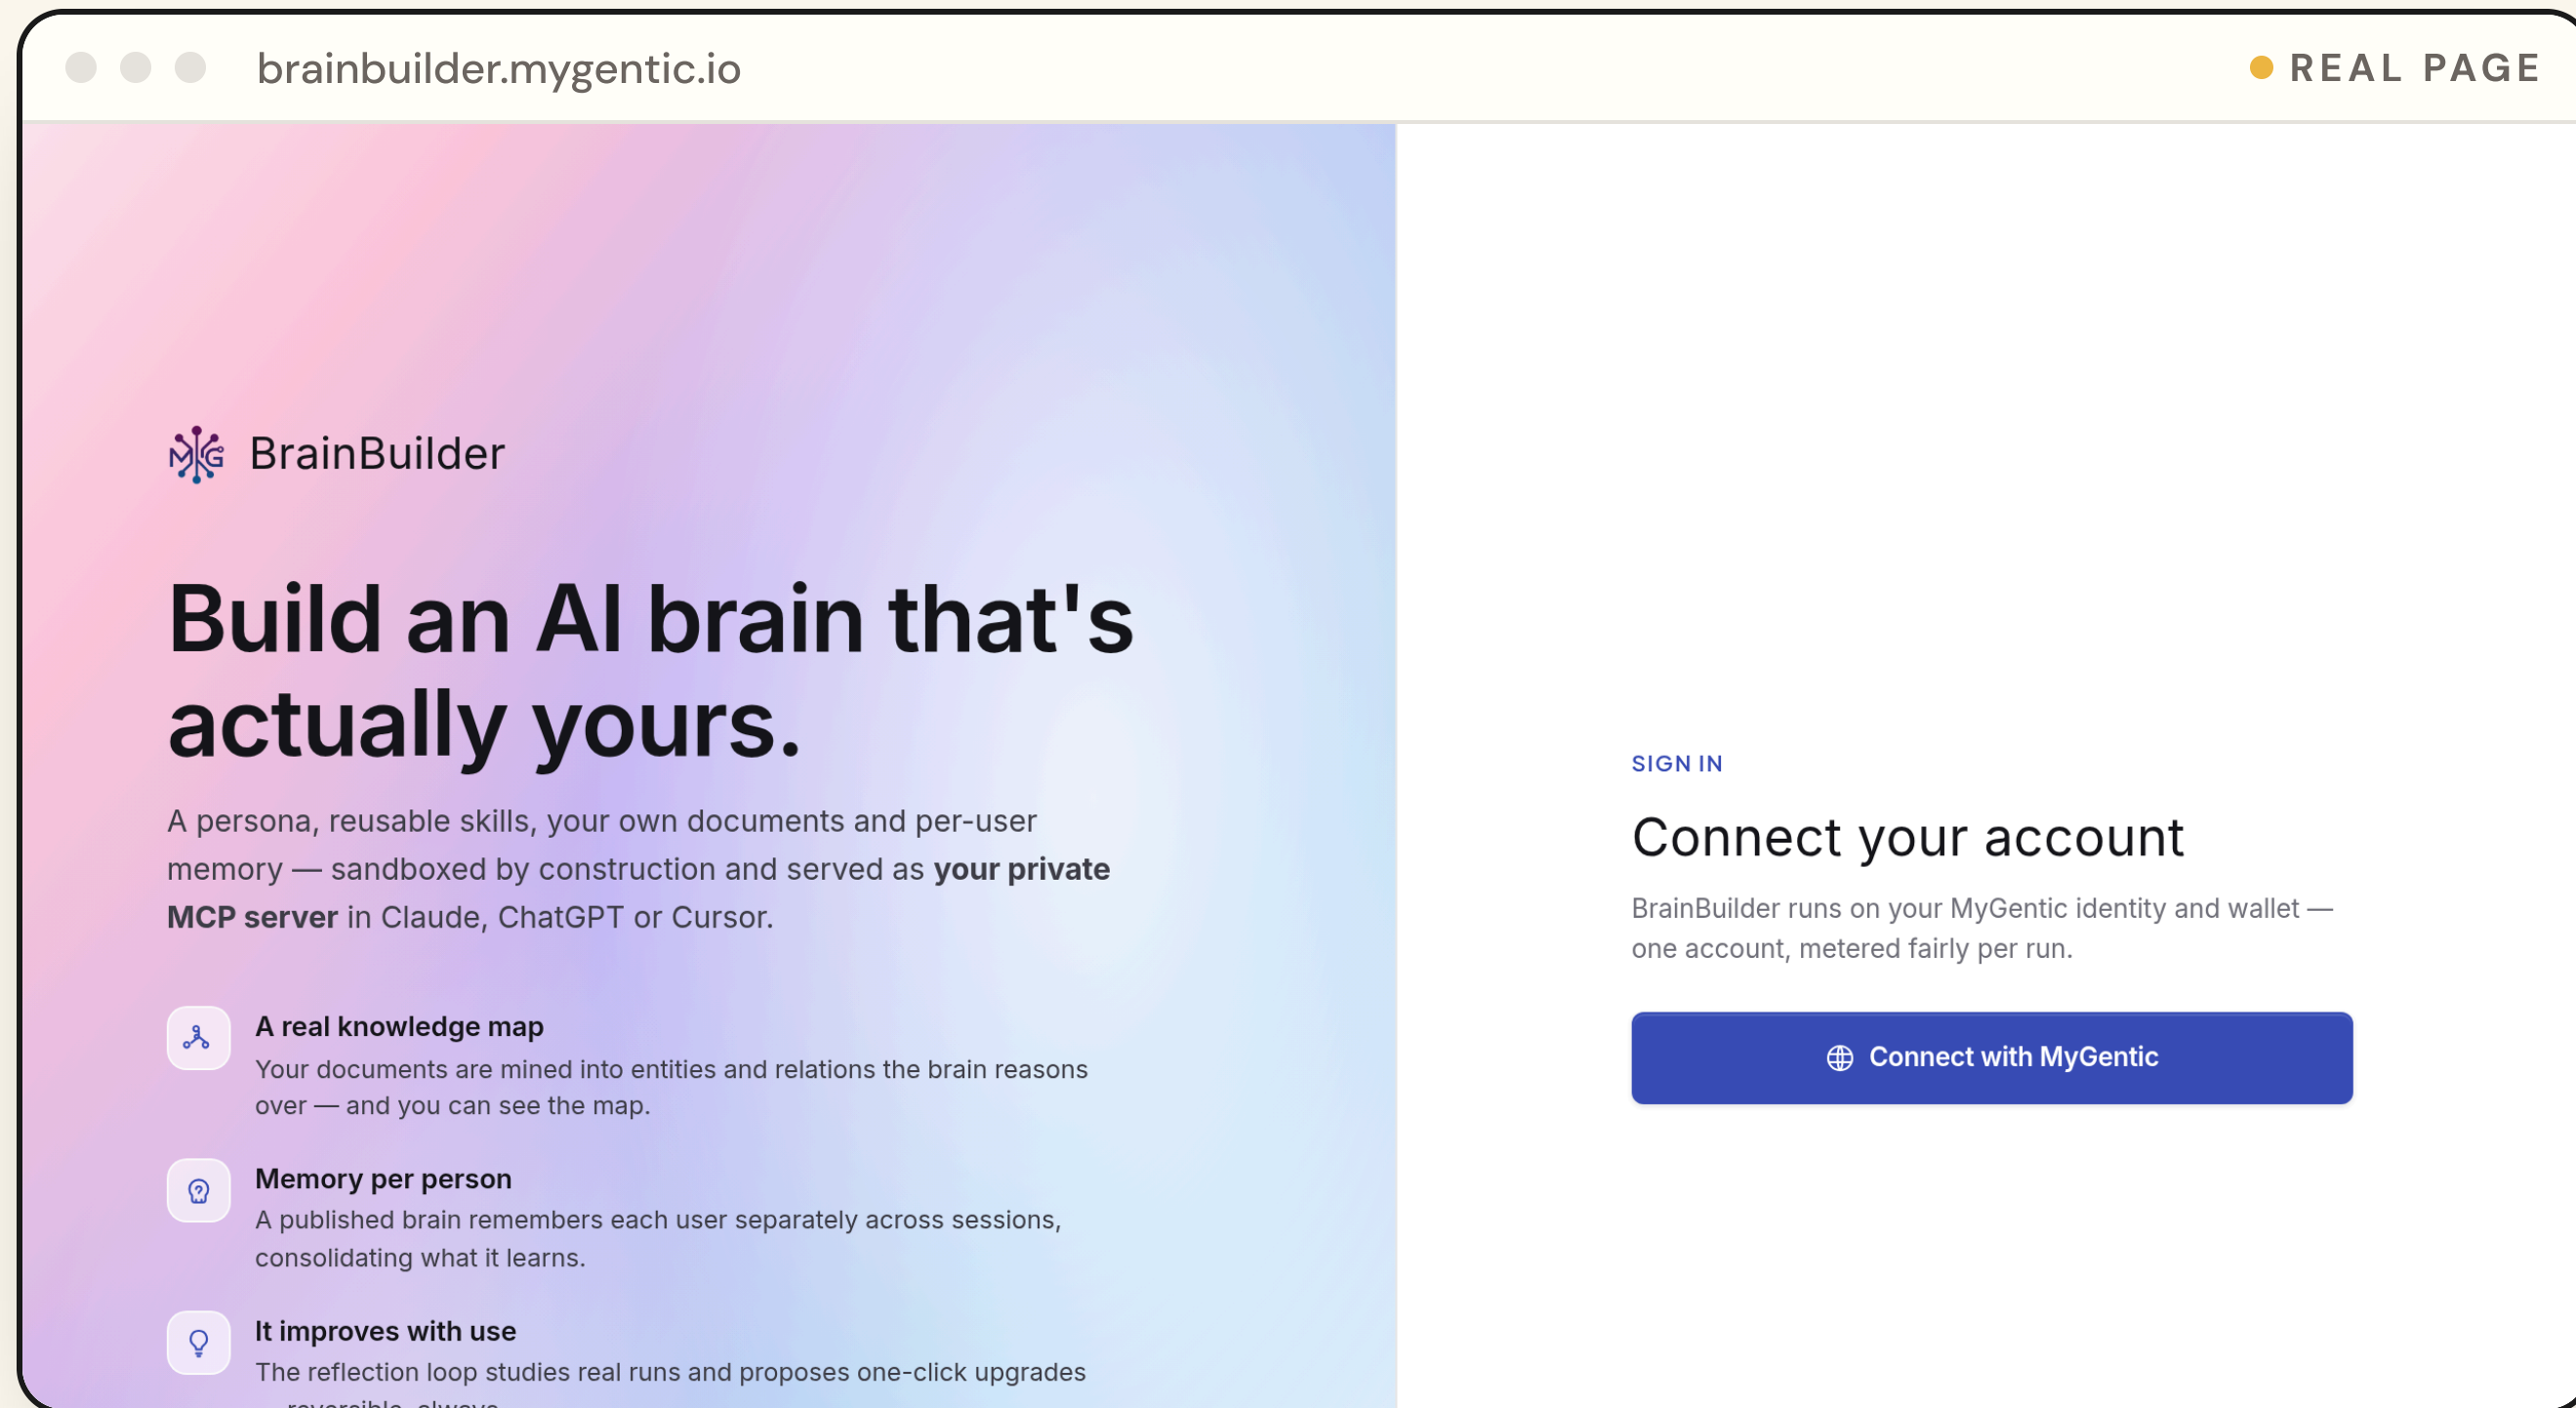

jobs it does

Persona

how it talks

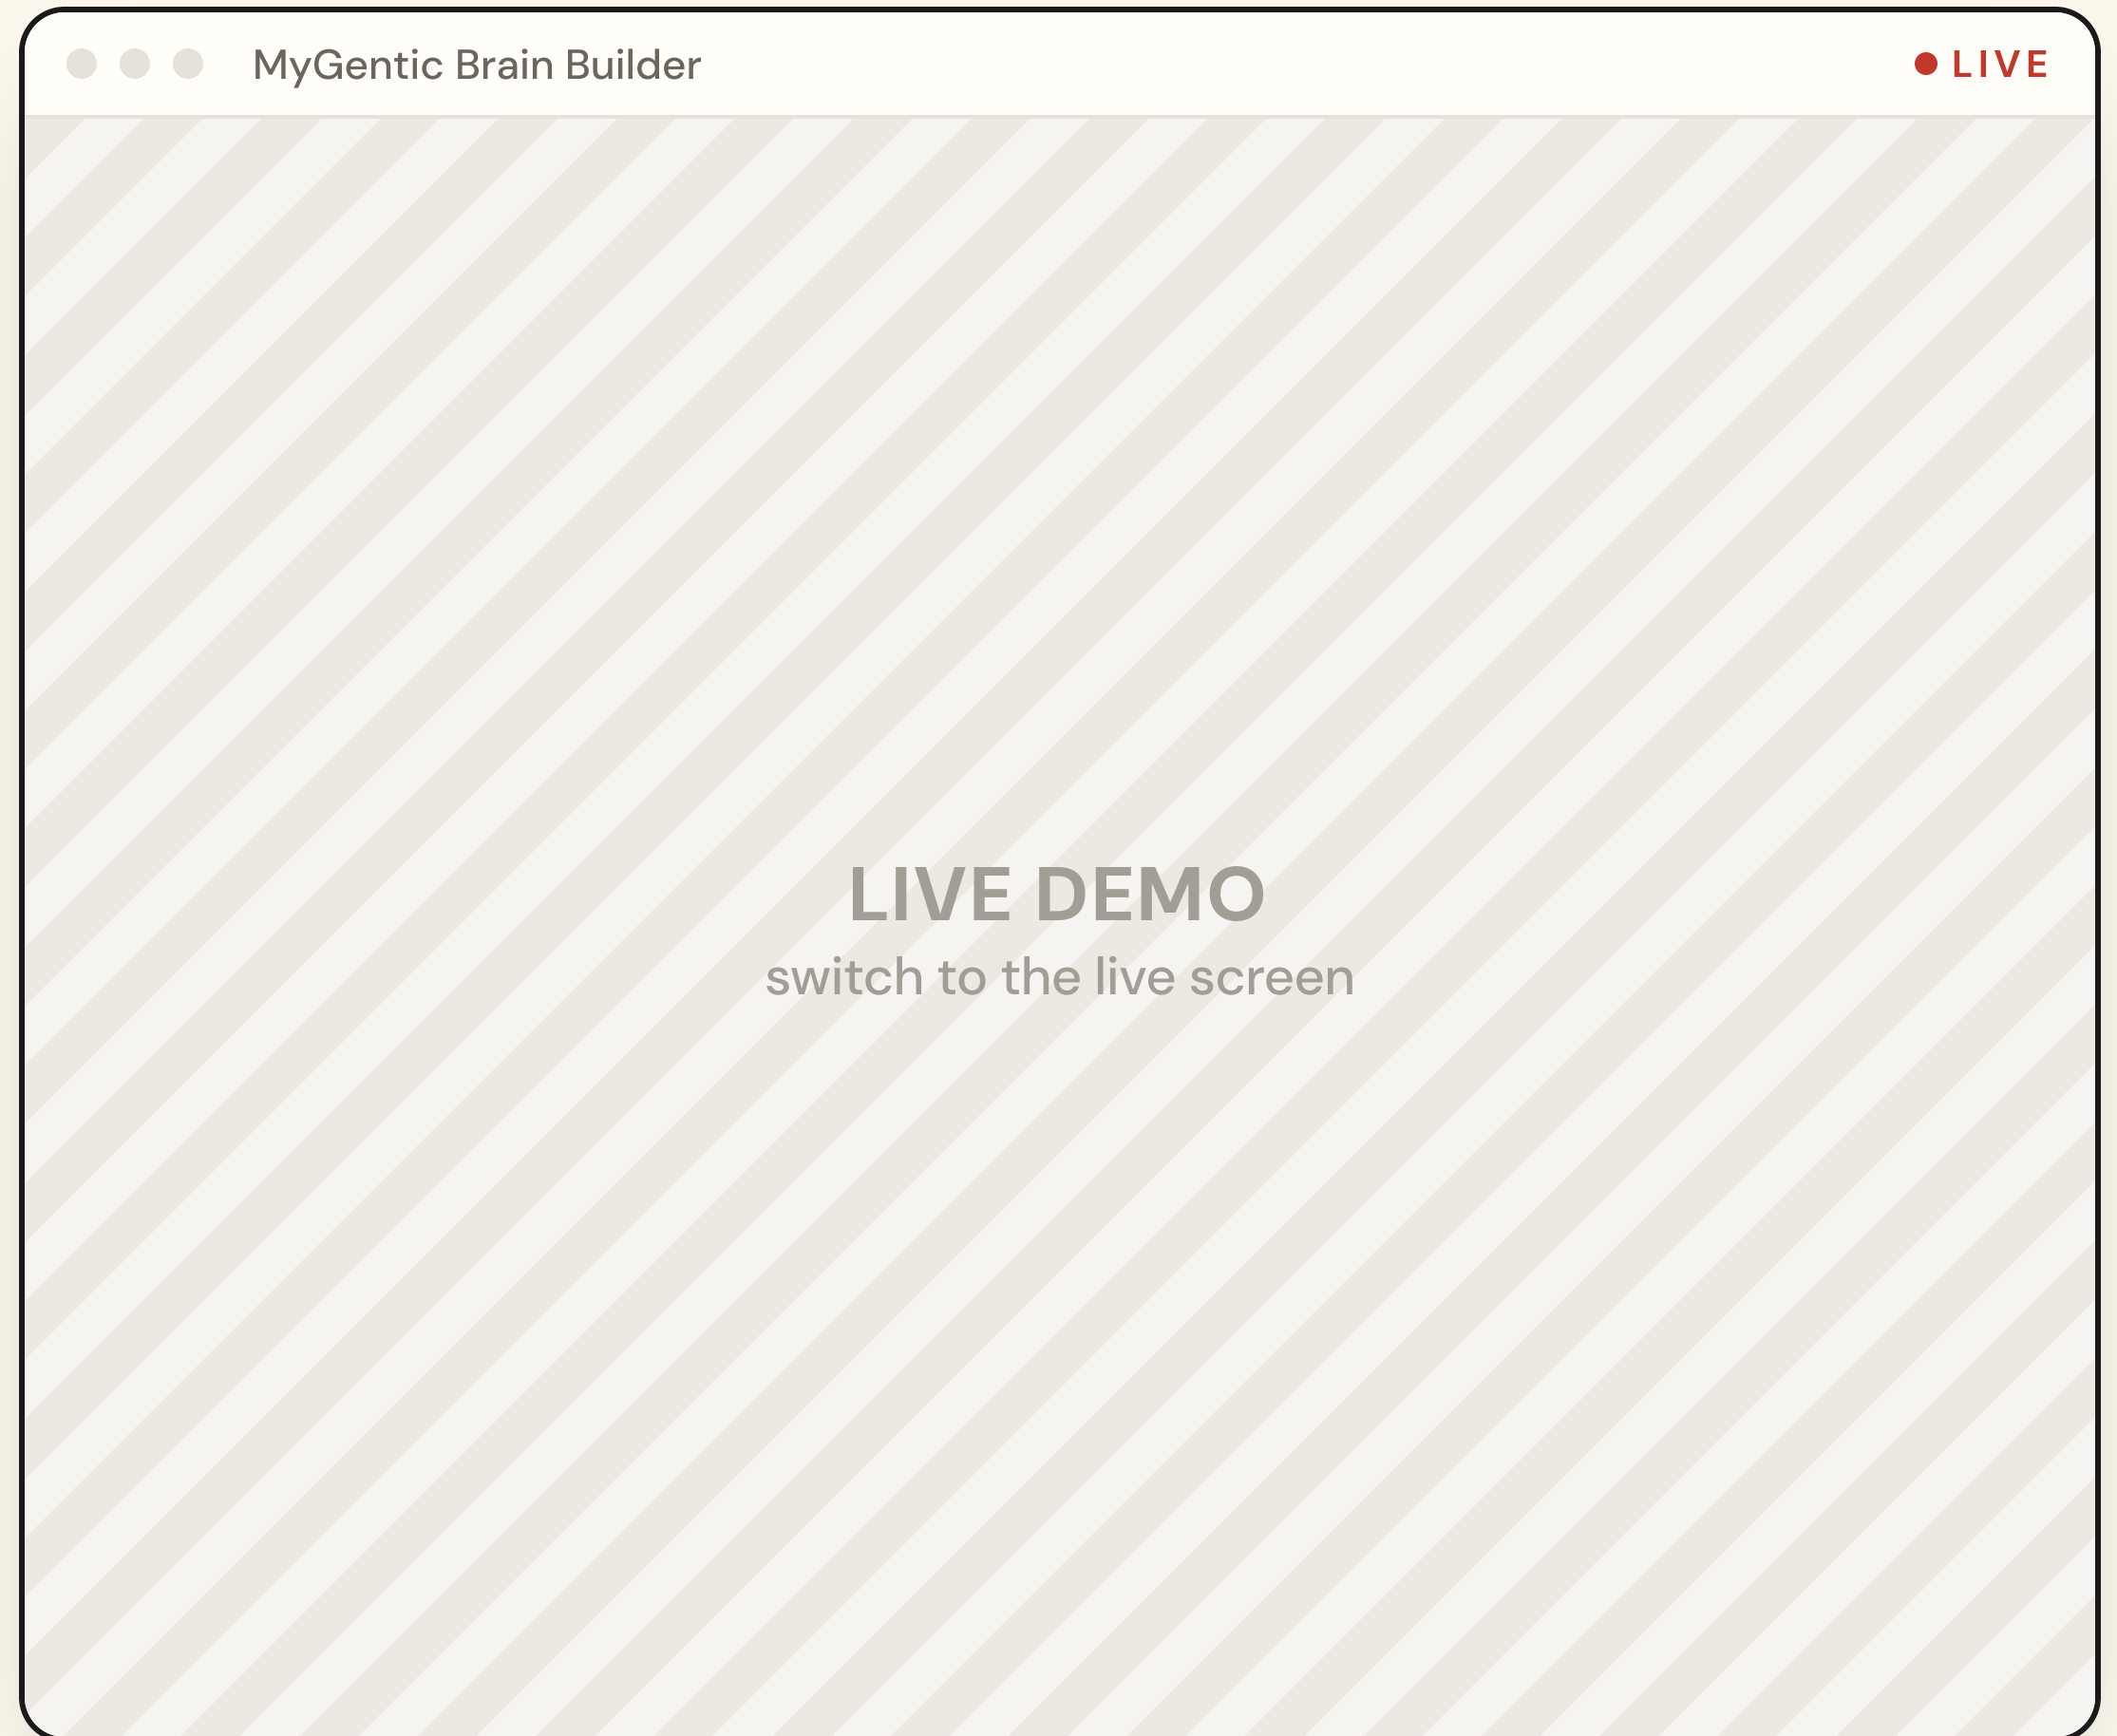

Where your Genius lives.

Load what you know.

Hey Genius, set up my Genius

- 1 Clean playbook
- 2 Knowledge → upload
- 3 Name your Genius

Load your playbook. Name your Genius.

Upload

Name

Who it's for

Then: “loaded ” in the chat

One skill. One job. Your way.

~~Answers anything~~

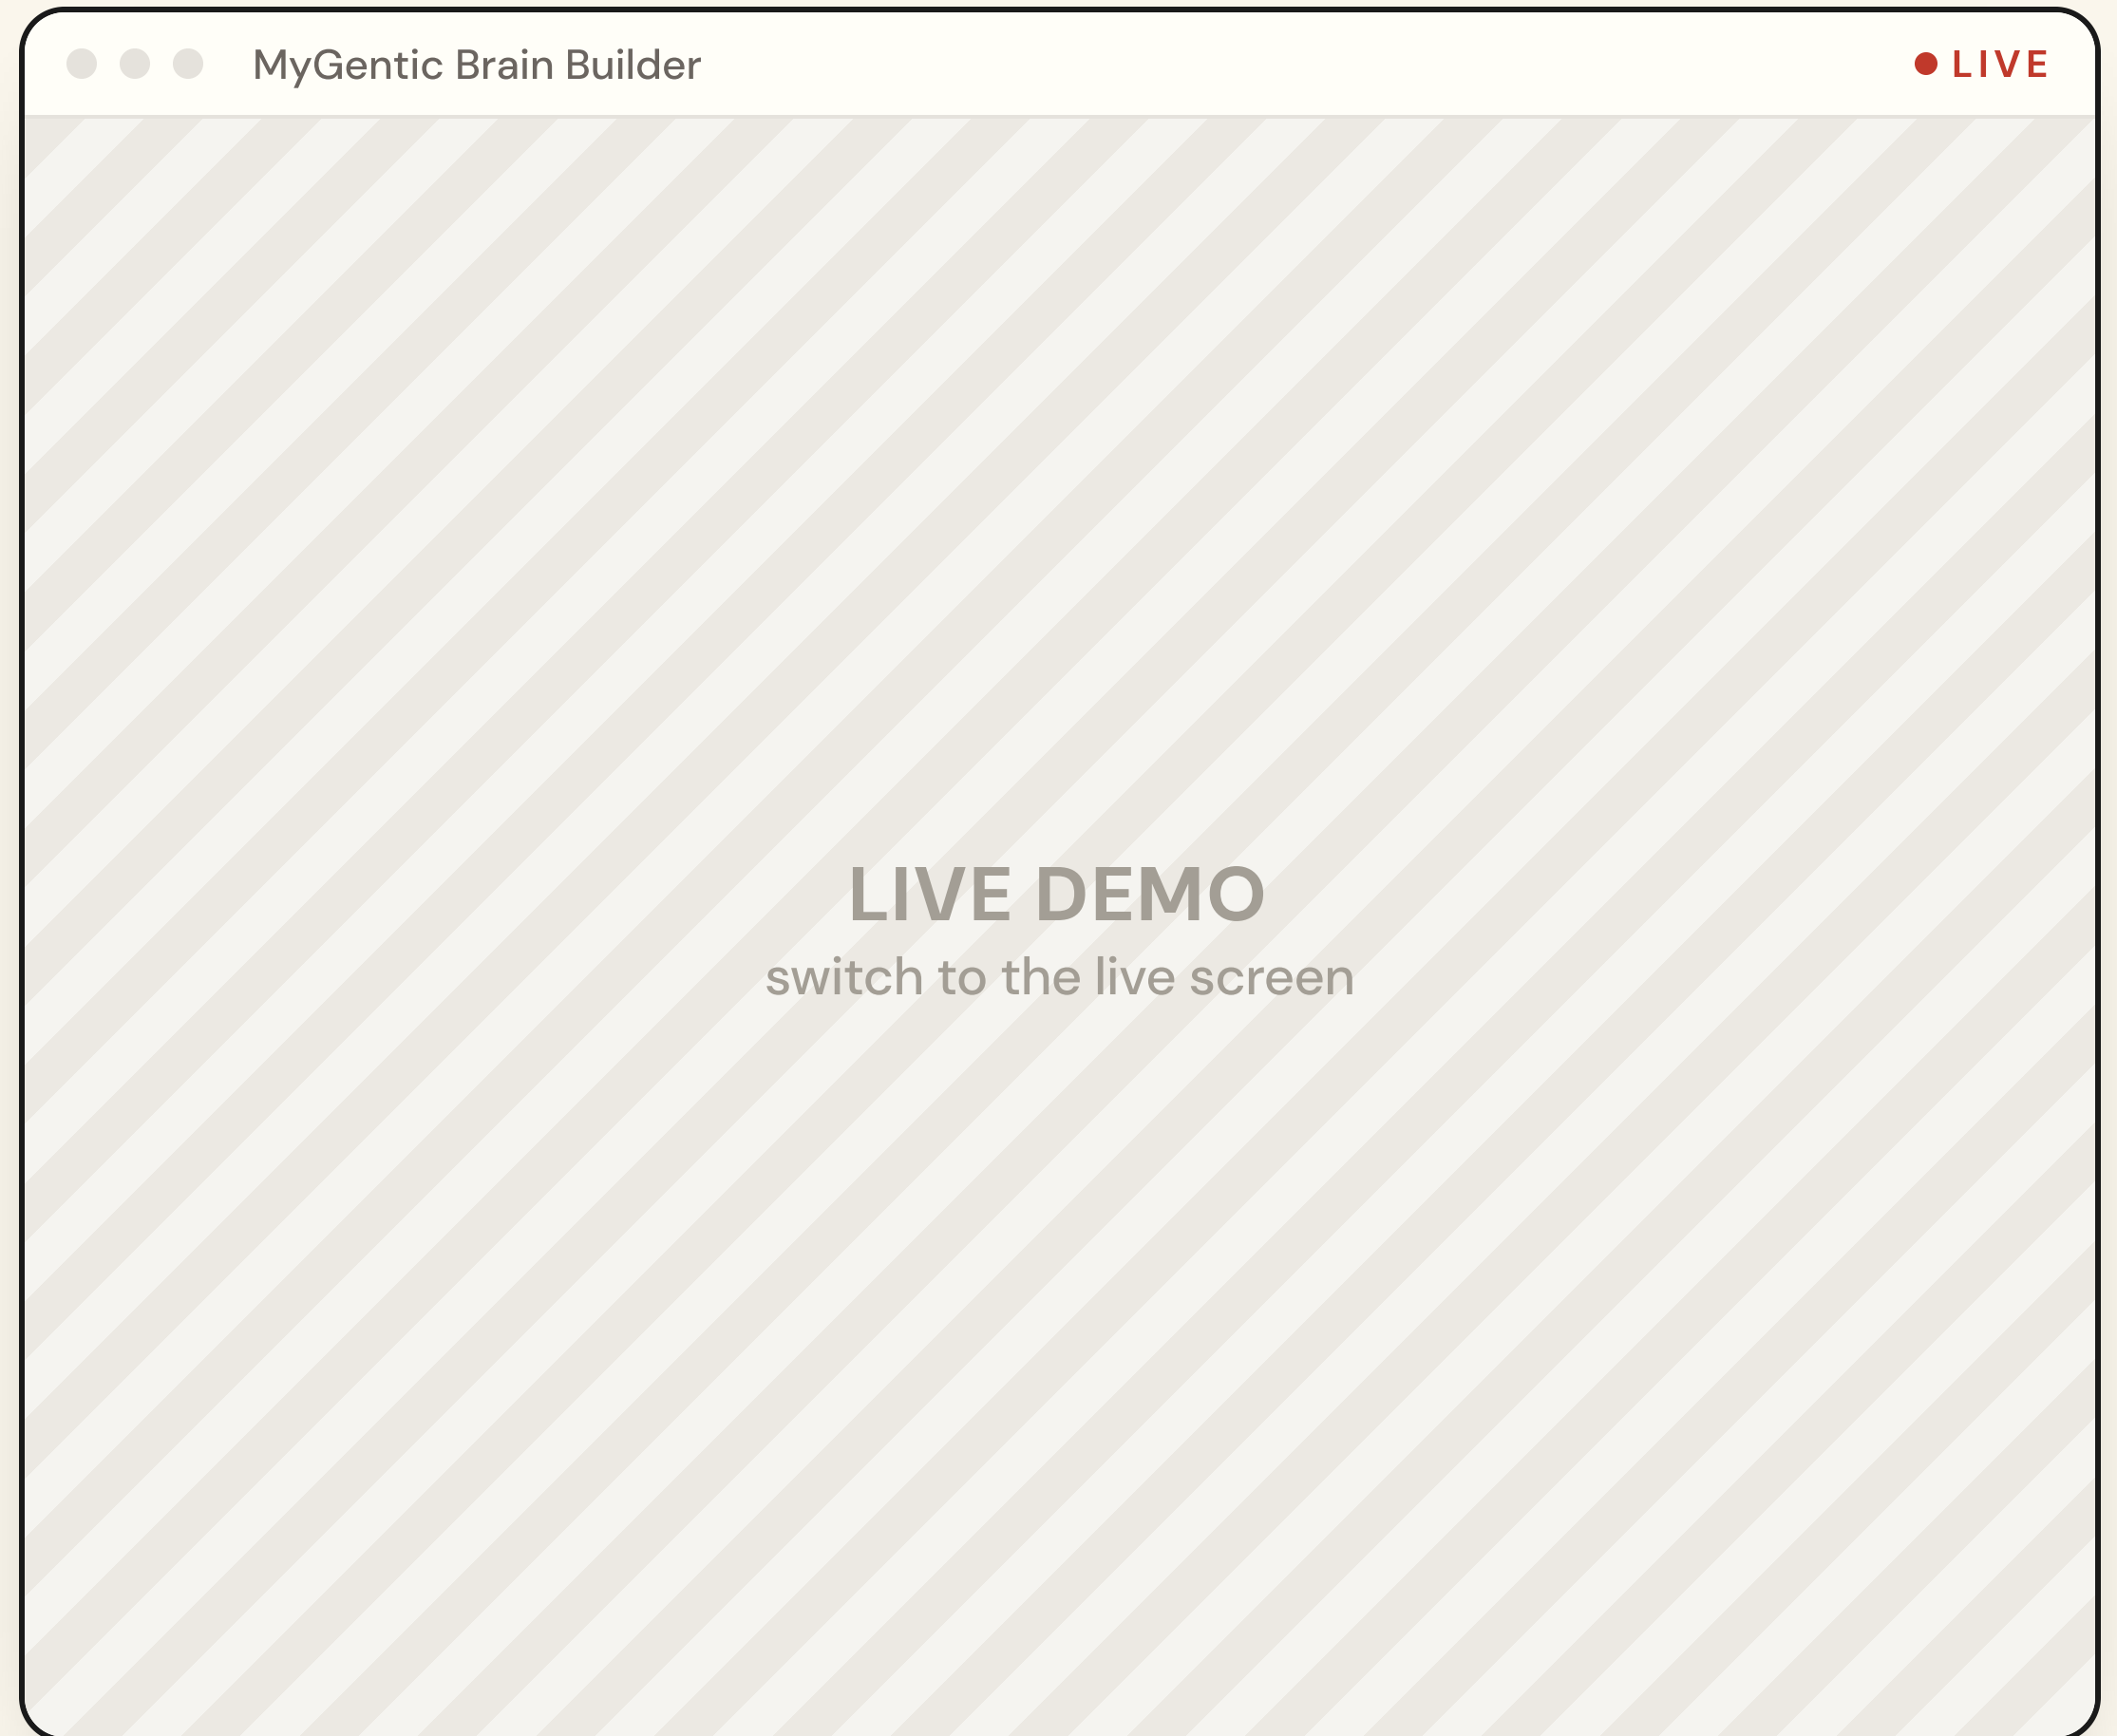

Does your job

Build your first skill.

Hey Genius, build my first skill

- 1 A job clients need
- 2 Your steps inside
- 3 Name it, switch it on

Name your first skill.

The job

When to use it

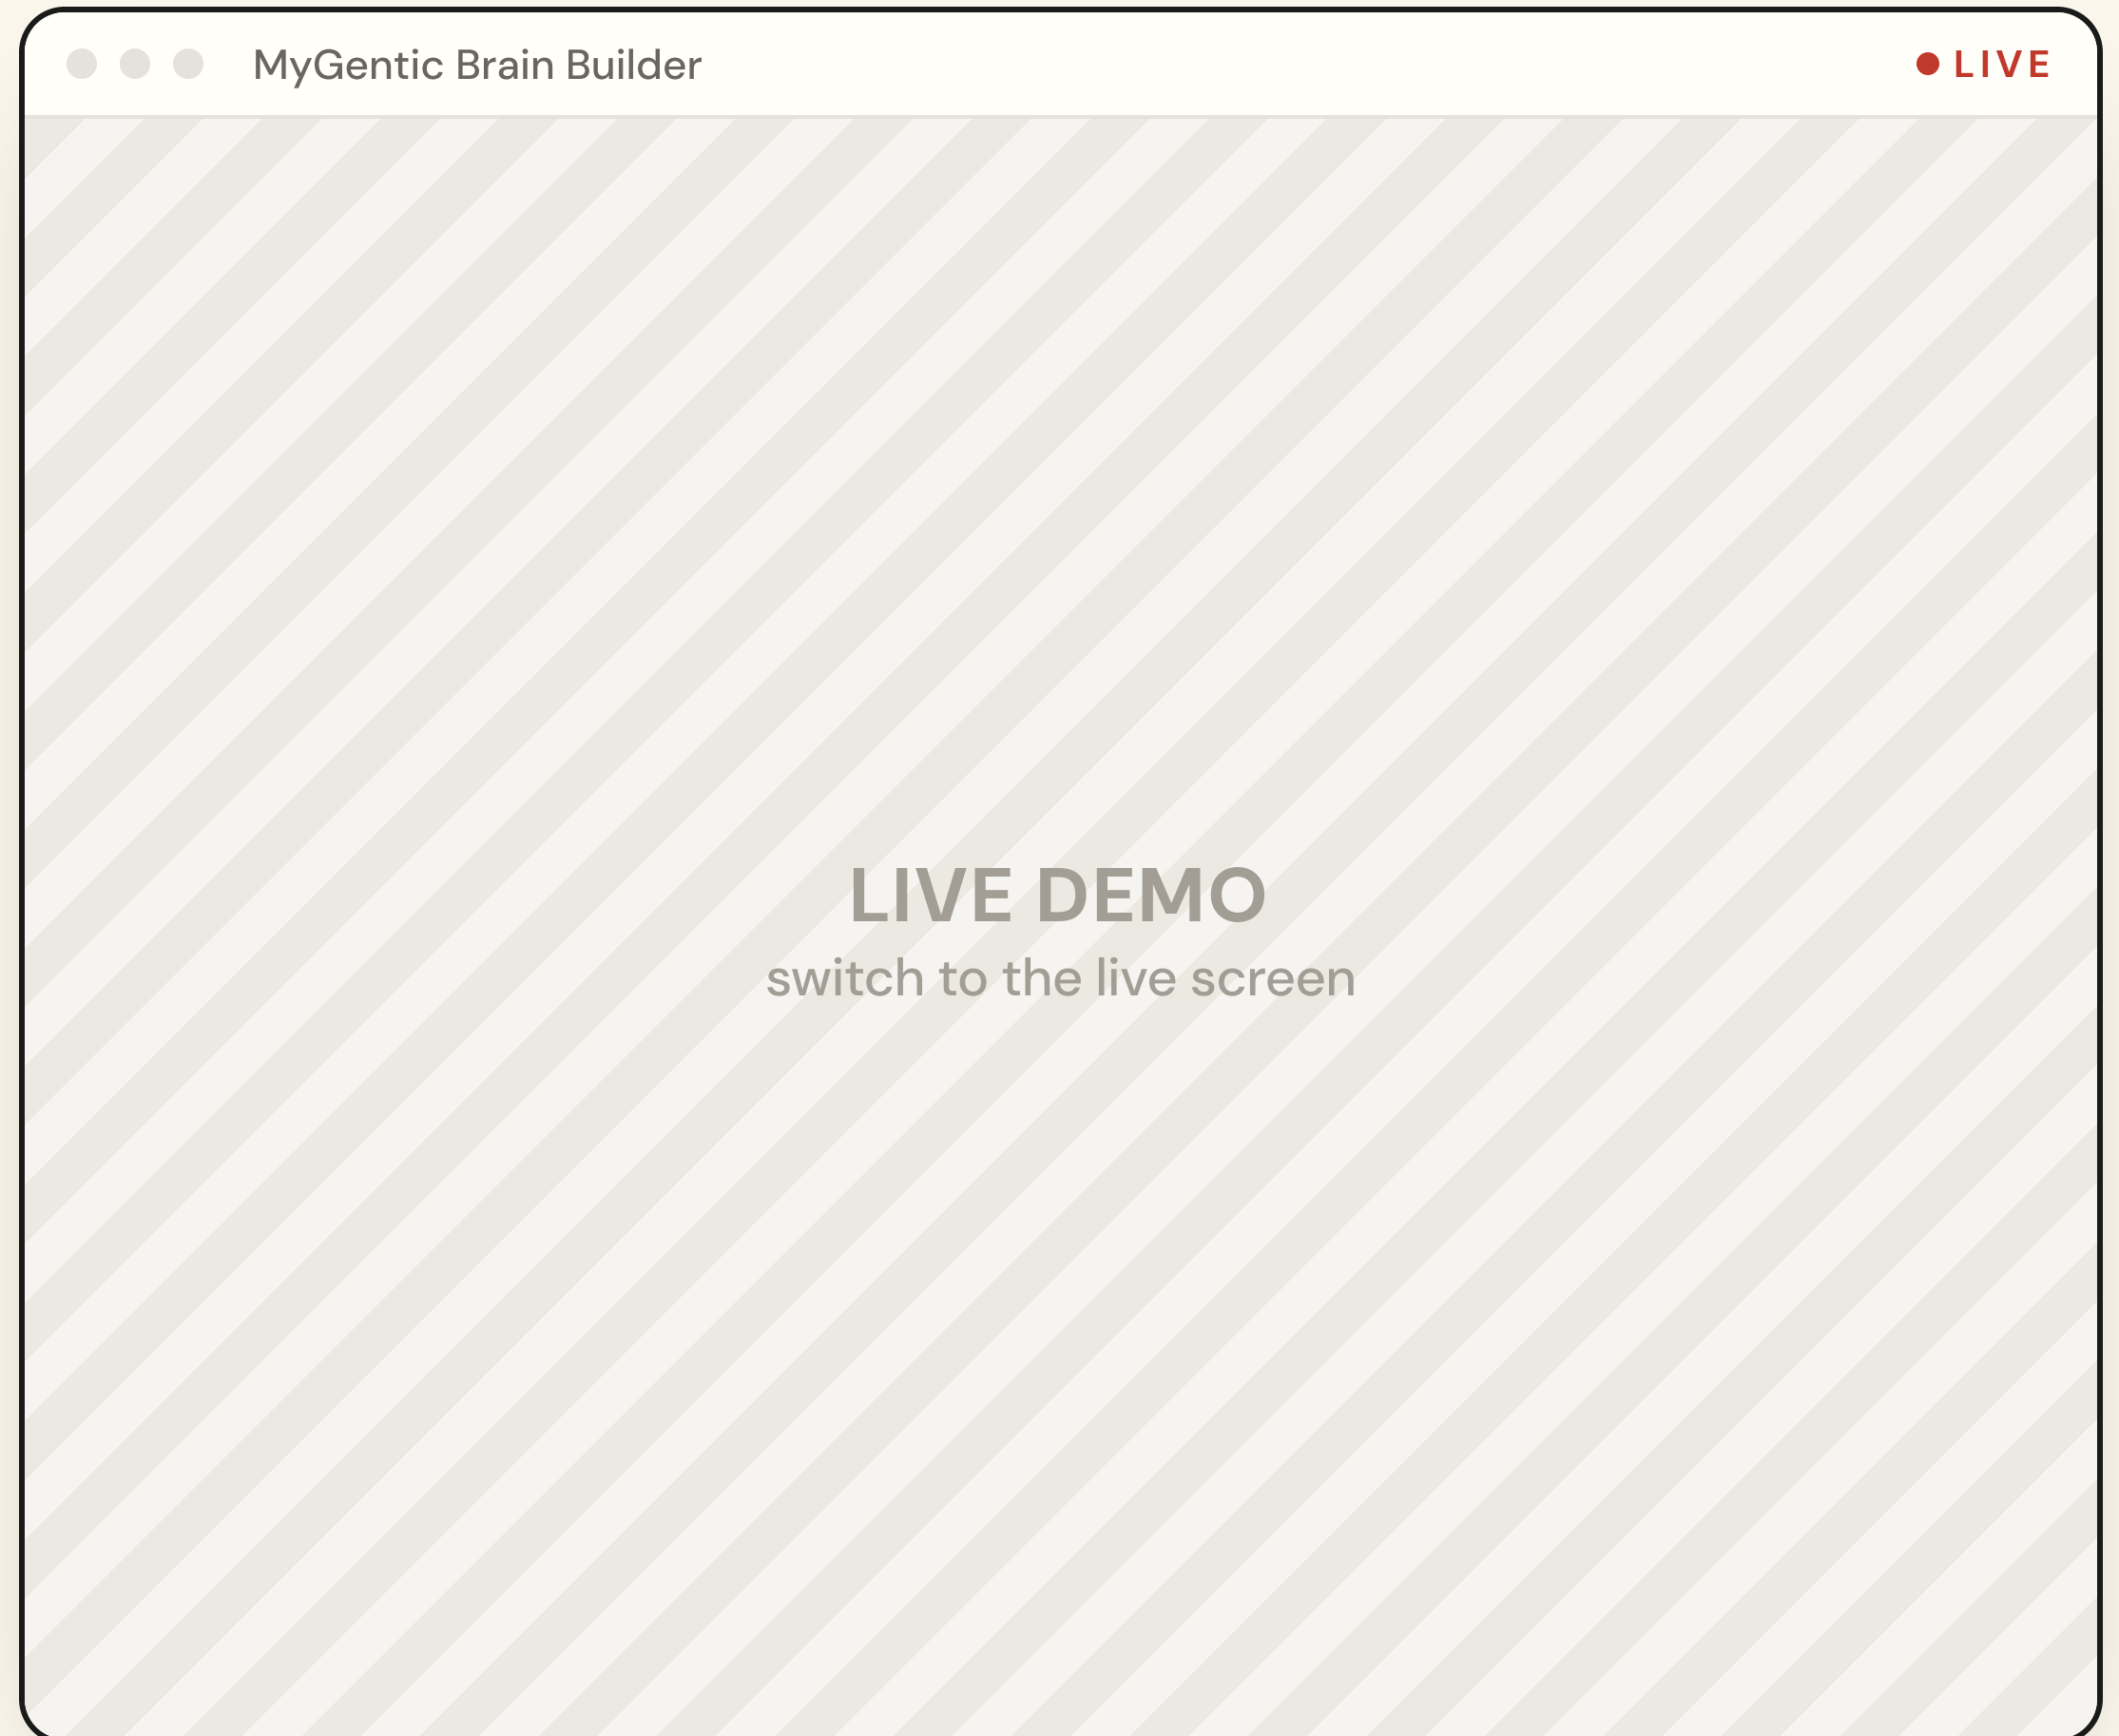

What it returns

Then: paste it into Skills

Give it your persona.

Hey Genius, write my persona

- 1 Three things you wrote
- 2 What it never does
- 3 When it calls you

It knows when to call you.

Serves clients **without** you in the room.

Write your persona.

Sounds like me

Never does

Calls me when

Then: paste it into Persona

Plug it into the AI you use.

ChatGPT

connect once

Claude

same Genius

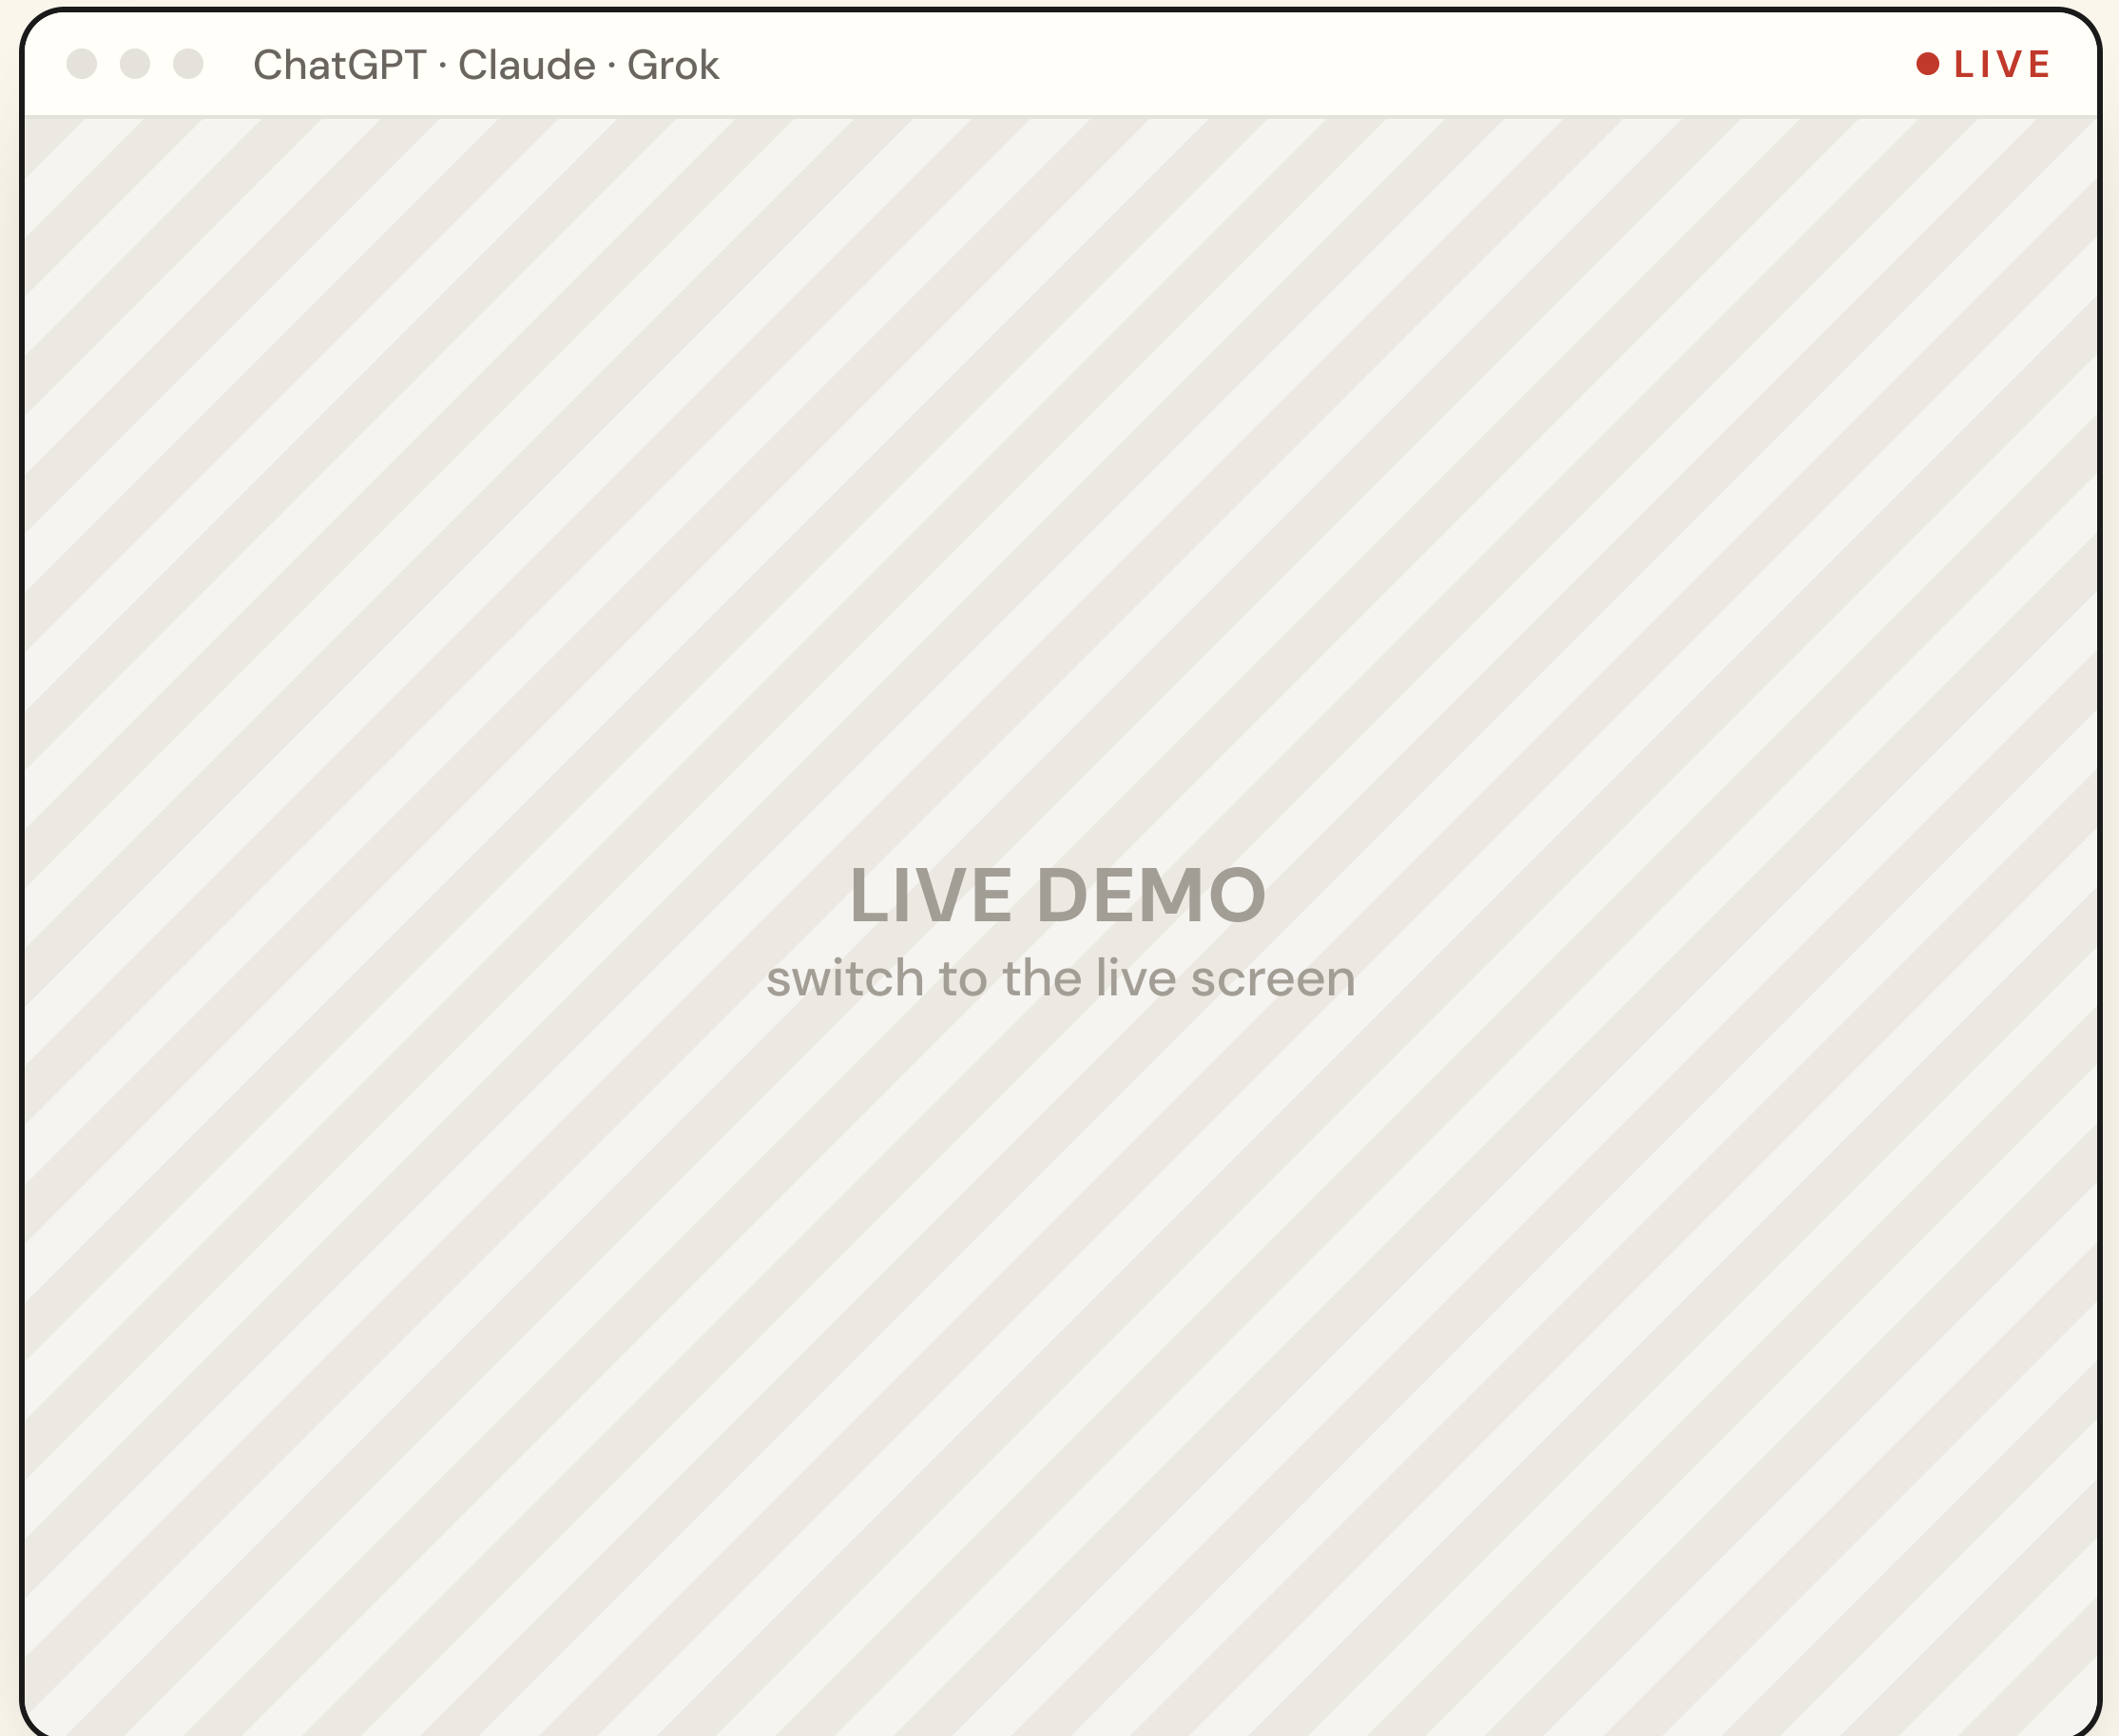

Grok

answers as you

Ask it inside your AI.

Hey Genius, answer as me:
[client question]

- 1 Your Genius connected
- 2 Real question, no names
- 3 Note one fix

“Meet [Genius name].”

Post its first answer in Circle · no client names

1 **Ask it five questions**
in the AI you use

2 **Mark each answer**
right? sounds like me?

3 **Bring one client question**
names removed
